We Serve Clients Nationwide in Various Sectors

Healthcare | Universities | Manufacturing | Industrial | Hospitality | Entertainment | Real Estate | Data Centers | Government

Any procurement strategy should be customized to a specific buyer's budgetary needs and risk appetite, as well as the prevailing market conditions. Our risk-management approach includes analyzing supplier and contract risk, market commodity risk, infrastructure risk, and regulatory risk.

We advocate for:

+ Analytics to drive decision making
+ Aggregation of supply to drive down costs and improve contract language
+ Alignment of internal stakeholders (including finance and facilities) to develop a strategy that solves for the needs within your organization

Talk to our experts to identify a solution that works for you. Even if you are currently under contract, we can help by reviewing market conditions years into the future. Long-term buying horizons allow buyers to respond to value, create a more stable cost environment, and lower overall spend.

Energy Products Include:

- Fixed-rate products
- Managed block & index products
- Customized hedging strategies
- Renewable Energy Credits (RECs)
- Physical Power Purchase Agreements (PPAs)
- Virtual Power Purchase Agreements (VPPAs)
